

Why is New York Not Leading?

New York is falling behind the rest of the country on progressive marijuana policy! NY supports medical marijuana (MMJ) by a whopping 96%, yet our MMJ program is rated by Americans for Safe Access at 23 out of 44 MMJ programs nationally. New Yorkers support legalizing marijuana for adults to use by 54%. Targeting our black and brown communities for low-level marijuana busts is not what New Yorkers want, why don't we change it?

Broad reform of our cannabis laws can only come through a constitutional convention. Our legislature is bought and sold and will never do it right. We are the special interest group that can change NY for the better.

Here are just some of the benefits for NY:

- \$500m regulatory and license fees
- \$138m income tax revenues
- 53,000 good union jobs with benefits
- 700 lives saved every year from opioid overdose
- reduce access by children to marijuana
- eliminate contaminated marijuana from adult use market
